PROFILE

Technical Support and AR Engineer within the Developer Experience team at Snap Inc with 4+ years of experience supporting developers, debugging complex software issues, building internal tools, and creating technical documentation. Experienced working directly with engineers, enterprise partners, and developer communities to investigate issues, improve workflows, and scale support operations.

Strong background in TypeScript, JavaScript, Python, APIs, AI-assisted development, and developer tooling. Passionate about understanding how developers work, eliminating friction, and turning recurring problems into scalable solutions through automation, documentation, and product improvements.

EXPERIENCE

AR Engineer, Developer Experience - Snap Inc. (Dec 2023 – Present)

- Build developer-facing tools, sample projects, backend-connected experiences, and technical resources.
- Debug complex technical issues involving APIs, integrations, frontend systems, backend services, and developer workflows.
- Create implementation guides, tutorials, troubleshooting resources, and technical documentation.
- Collaborate with Product and Engineering teams.

Lens Studio Support Specialist - Snap Inc. (Apr 2022 – Dec 2023)

- Resolved 1,700+ developer support cases.
- Reduced support backlog by 3,700+ tickets and contributed to ~25% SLA improvement.
- Investigated production incidents, integration failures, and platform issues.
- Turned recurring issues into documentation, troubleshooting resources, and product feedback.
- Built internal knowledge systems and troubleshooting playbooks.

Programming Instructor - Udemy (2013 – Present) Link [here](#)

- Teaching software development and programming to 7,400+ students.

Guided Project Instructor - Coursera (Aug 2020 – Jan 2022) Link [here](#)

- Delivered 15 guided technical projects covering Python, programming, and web development.

SELECTED PUBLIC WORK

- [World Kindness Day](#): Snap Spectacles Sample Project
- [Snap Cloud Leaderboard Example](#): Snap Official Docs
- [Bitmoji Runner Game Tutorial](#): Snap Official Docs
- [Segmentation Tutorial](#): Snap Official YouTube Channel

SELECTED PROJECTS (GITHUB)

React Projects Portfolio

- Built frontend and full-stack React applications
- Implemented UI interactions, state management, and API integrations

Prompt-to-Product (AI-driven development)

- Built full-stack apps using AI-assisted workflows
- Applied prompt engineering for iterative development

SpendSmart - AI-Assisted Expense Tracker

- Built Next.js app using AI-assisted workflows (Claude)
- Demonstrates prompt engineering, A/B comparison, structured AI dev process
- Stack: Next.js, TypeScript, Tailwind, Recharts, localStorage

CORE STRENGTHS

- Developer Experience & Tooling
- React - TypeScript - JavaScript - Python
- Technical Support & Debugging
- APIs & Backend Integrations
- AI Workflows (Claude, MCP, Prompt Engineering)
- Documentation & Tutorials

PROFESSIONAL DEVELOPMENT

- Real-World AI for Everyone Specialization
- Google IT Support Professional Certificate
- Full-Stack Development Track - Udacity Nanodegree
- Data Analyst - Udacity Nanodegree
- C# Programming for Unity Game Development Specialization
- Anthropic Claude Agent Skills / MCP / Advanced MCP
- Generative AI Software Engineering

- Meta React Native Specialization
- Meta Front-End Developer Professional Certificate
- Google PM Specialization (in progress)
- Duke AI Product Management Specialization (in progress)

EDUCATION

Bachelor's Degree - University of Jordan

LANGUAGES

English (Professional) | Arabic (Native)
